WORK EXPERIENCE

Senior Business Analyst

EPAM Spain   2022 - Present

- I worked at Everest Re. We built a new Data Platform to manage data, migrating over twenty data sources to the data lakehouse. I facilitated data wrangling, modeling, and requirements gathering, leveraging SQL to analyze and extract insights from complex data sets. Our solution enabled businesses to use this data for machine learning and report creation, boosting efficiency and performance.

- I worked at Liberty Mutual. My team and I automated the claim-handling process and developed the event-driven process for the first notification of loss automation, streamlining operations and improving overall productivity. I was responsible for stakeholder management, requirements, and documentation on the project. Our solution enabled to handle 10% of claims automatically.

Senior Business Analyst

EPAM Belarus   2020-2022

- Acted as a Product Owner in the VTB-Light activity. I was in charge of Money Transfer services in the application. I managed a team of eight people, shared the product vision with the team, prepared requirements, prioritized features, and managed the backlog to ensure efficient and effective development processes. We have successfully launched the domestic card2card money transfer service. And implementing a new optimization feature that should decrease Bank's money transfer costs in the VTB-Light application by 0,15 % per transaction.

- Worked on VTB Bank project in the Money Transfer Department. I played a crucial role in enhancing and developing new features, bringing my expertise to bear on integrations with Internet Service Providers. Through analyzing existing processes, performing gap analysis, proposing solutions, managing stakeholders, and leveraging data analysis, I was able to help identify areas for improvement and develop strategies to optimize business operations.

- Worked on Ticketmaster project. I played an active role in creating a sports e-ticketing online selling service. In particular, I helped facilitate the migration from legacy systems to a modern microservices architecture. My efforts in creating a project knowledge base and executing system re-engineering helped improve operational efficiency and allowed smoothly migrate to microservices.

Business Analyst

Intervale   2018 - 2020

- Led analytics work of the "International Bank of Tajikistan" Payment Mobile application from scratch. Went through all process stages, from the product view to system deployment and application maintenance. We successfully launched the app, which was downloaded over 100K times.

- Made significant contributions to enhancing the E-commerce platform's core product and successfully facilitated six integrations with bank acquirers and server providers using REST and SOAP API. My responsibilities included eliciting and analyzing requirements, conducting system analysis to ensure effective interaction with external systems, proposing solutions, managing requirements, and documenting.
